

Dear Brothers and Sisters,

9/18/2018

Management informed the APWU that beginning today management will be starting to manually input pay adjustments for the missing pay—which was mostly overtime--for pay period 21-2018. They will begin with the individuals who are missing the most hours of pay. They plan on having the majority of pay adjustments inputted and submitted so that the pay will appear on the next pay check.

Management has taken the position that pay advances will not be given for overtime. Consistent with the information provided in my previous email, any individual that is missing 8 hours of pay or more can request a pay advance. If management denies the pay advance the individual may file a grievance locally.
